# Background

# Congressional mandates for federal data collection

## The Science and Engineering Equal Opportunities Act of 1980

<https://www.congress.gov/bill/96th-congress/senate-bill/568/text>

### BIENNIAL REPORT

SEC. 37. (a) By January 30, 1982, and biennially thereafter, the Director shall simultaneously transmit a report to the Congress, the Attorney General, the Director of the Office of Science and Technology Policy, the Chairman of the Equal Employment Opportunity Commission, the Director of the Office of Personnel Management, the Secretary of Labor, the Secretary of Education, and the Secretary of Health and Human Services.

Report to Congress and certain Federal agencies.  
42 USC 1885d.

(b) The report required by subsection (a) shall contain—

Contents.

(1) an accounting and comparison, by sex, race, and ethnic group and by discipline, of the participation of women and men in scientific and technical positions, including—

(A) the number of individuals in permanent and temporary and in full-time and part-time scientific and technical positions by appropriate level or similar category;

(B) the average salary of individuals in such scientific and technical positions;

(C) the number and type of promotional opportunities realized by individuals in such scientific and technical positions;

(D) the number of individuals serving as principal investigators in federally conducted or federally supported research and development; and

(E) the unemployment rate of individuals seeking scientific and technical positions;

(2) an assessment, including quantitative and other data, of the proportion of women and minorities studying scientific and

## America COMPETES Reauthorization Act of 2010

<https://www.congress.gov/111/plaws/publ358/PLAW-111publ358.pdf>

PUBLIC LAW 111-358—JAN. 4, 2011

124 STAT. 4007

**SEC. 505. NATIONAL CENTER FOR SCIENCE AND ENGINEERING STATISTICS.** 42 USC 1862p.

(a) **ESTABLISHMENT.**—There is established within the Foundation a National Center for Science and Engineering Statistics that shall serve as a central Federal clearinghouse for the collection, interpretation, analysis, and dissemination of objective data on science, engineering, technology, and research and development.

(b) **DUTIES.**—In carrying out subsection (a) of this section, the Director, acting through the Center shall—

(1) collect, acquire, analyze, report, and disseminate statistical data related to the science and engineering enterprise in the United States and other nations that is relevant and useful to practitioners, researchers, policymakers, and the public, including statistical data on—

- (A) research and development trends;
- (B) the science and engineering workforce;
- (C) United States competitiveness in science, engineering, technology, and research and development; and
- (D) the condition and progress of United States STEM education;

Reports.  
Public  
information.

# National Center for Science and Engineering Statistics

Measuring America's progress in science, technology, and innovation

Part of the U.S. National  
Science Foundation (NSF)

One of 13 principal federal  
statistical agencies

*Overseen by the U.S. Chief Statistician  
within the White House Office of  
Management and Budget (OMB)*

## MANDATE

Serve as a central **federal clearinghouse** for the collection, interpretation, analysis, and dissemination of **objective data** on the **U.S. science and engineering enterprise**

*Section 505 of the America COMPETES Reauthorization Act of 2010*

# CHIPS and Science Act of 2022 (§ 10317)

---

NSF/NCSES, in coordination with NIST [National Institute of Standards and Technology] and other federal statistical agencies, shall establish a Cybersecurity Workforce Data Initiative that

- Assesses the feasibility of providing nationally representative estimates and statistical information on the cybersecurity workforce
- Utilizes the NICE framework or other frameworks, as appropriate
- Utilizes existing data on employer requirements and unfilled positions
- Consults key stakeholders
- Evaluates existing federal survey data
- Evaluates administrative data
- Collects credential attainment and employment outcome data

# Defining the population

1. Scan of existing definitions
2. Interviews with subject matter experts
3. Working definition report
4. Workshop

Hogan M, Bean de Hernandez A, McHugh P, Arbeit CA, Sullivan P; National Center for Science and Engineering Statistics (NCSES). 2024. *Cybersecurity Workforce Data Initiative: Cybersecurity Workforce Definitions Report*. Alexandria, VA: National Science Foundation. <https://nces.nsf.gov/760/assets/0/files/nces-cwdi-working-definitions.pdf>

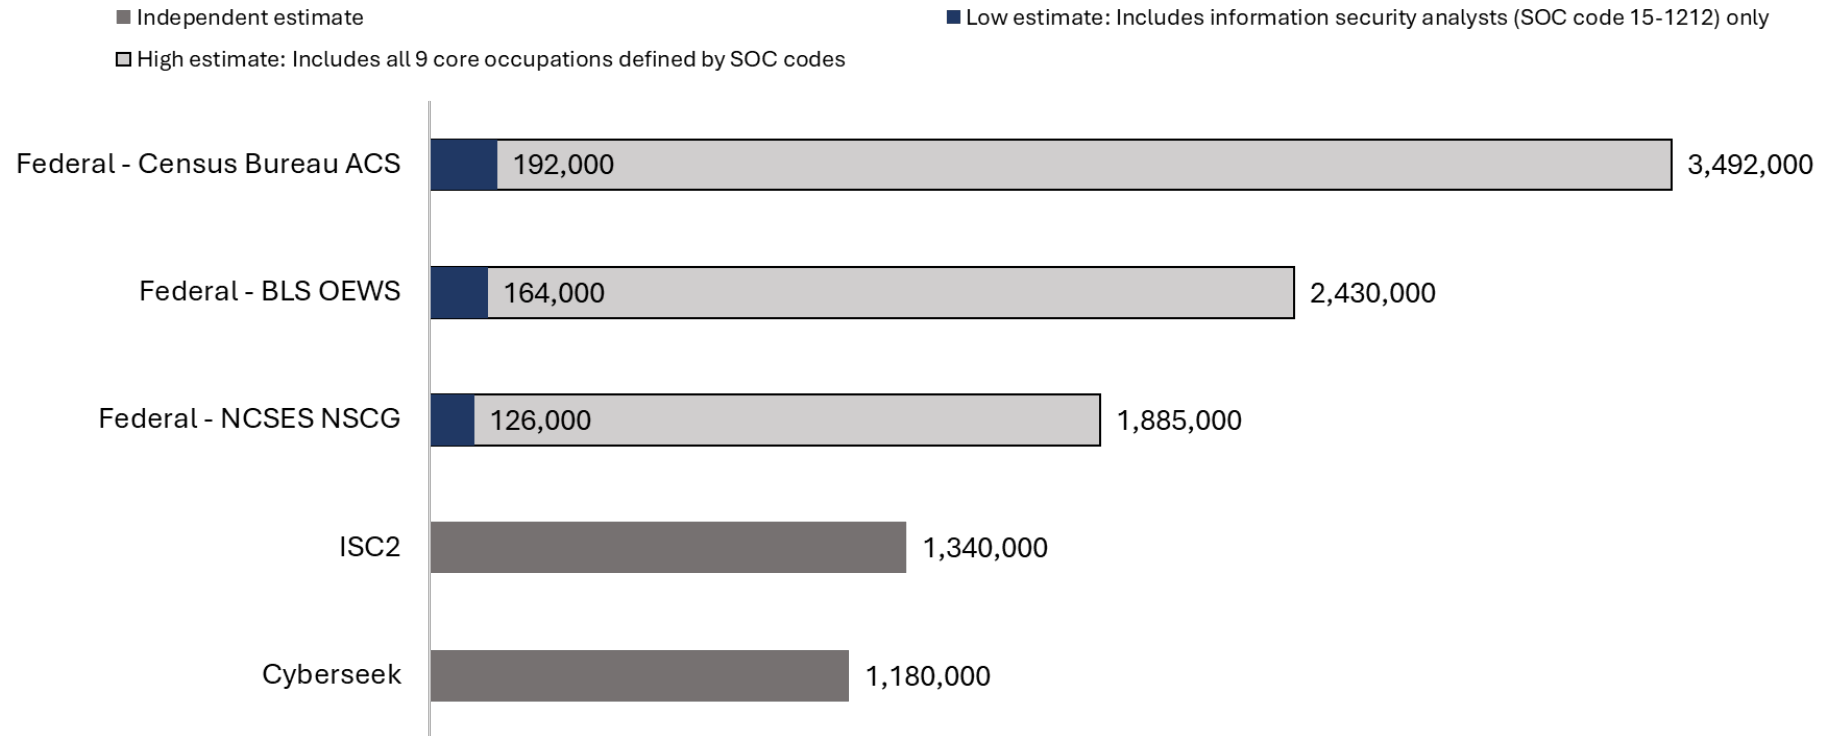

# Identify knowledge gaps

---

- What types of data are needed about the cybersecurity workforce?
- Conducted expert interviews
- Key types of information needed
  - Pathways into the cybersecurity workforce
  - Knowledge and skills that employers need the cybersecurity workforce to have
- Data sources that should be used
  - Data are needed from both employees and employers
  - Administrative data, survey data, or both

# Assessing existing data

## Estimates of Supply: Size of the Cybersecurity Workforce

Hogan M, Lilienthal K, Bean de Hernandez A, McHugh P, Arbeit CA, Sullivan P; National Center for Science and Engineering Statistics (NCSES). 2024. *Cybersecurity Workforce Data Initiative: Cybersecurity Workforce Supply and Demand Report*. Alexandria, VA: National Science Foundation. <https://nces.nsf.gov/760/assets/0/files/nces-cwdi-supply-demand-report.pdf>

Source(s): Publicly available data from Census Bureau ACS = American Community Survey; BLS OEWS = Bureau of Labor Statistics Occupational Employment and Wage Statistics; NSF NCSES NSCG = National Survey of College Graduates; ISC2 = International Information Systems Security Certification Consortium; Cyberseek

# Example of assessment of a federal survey: National Survey of College Graduates

---

- High relevance
- Maps to Census occupation codes
- Collects granular demographic and education data
- However, codes for field of degree and occupation are not detailed enough

Hogan M, Lilienthal K, Arbeit CA, Bean de Hernandez A; National Center for Science and Engineering Statistics (NCSES). 2024. *Cybersecurity Workforce Data Initiative: Federal Data Evaluation Report*. # Public presence and outreach

---

Cybersecurity  
Workforce  
Data Initiative

Email: [ncses-cwdi@nsf.gov](mailto:ncses-cwdi@nsf.gov)

# Next steps and conclusions

# Pilot data collection

---

- Workforce survey
  - Determine high-priority research questions
  - Develop and cognitively test questionnaire
  - Collect data
  - Process data
  
- Cognitive testing with businesses:
  - Testing cybersecurity questions with business in summer 2024

# Use of auxiliary data

---

- Catalogue non-survey data about nondegree credentials
  - How can the data be accessed?
  - What is the quality of the data?
- Determine whether the non-survey data could in theory be linked to the survey data designed in the pilot study
- Analyze non-survey data to answer key questions about the cybersecurity workforce

# Possible outcome of the feasibility study: Estimates of the cybersecurity workforce through an NCSES workforce survey

A24. The next question is about your work activities on your principal job. Which of the following work activities occupied at least 10 percent of your time during a typical work week on this job?

*Mark Yes or No for each item.*

|  | Yes                      | No                         |
|--|--------------------------|----------------------------|
|  | ↓                        | ↓                          |
| 1 Accounting, finance, contracts..... 1  | <input type="checkbox"/> | 2 <input type="checkbox"/> |
| 2 Basic research – study directed toward gaining scientific knowledge primarily for its own sake..... 1  | <input type="checkbox"/> | 2 <input type="checkbox"/> |
| 3 Applied research – study directed toward gaining scientific knowledge to meet a recognized need..... 1 | <input type="checkbox"/> | 2 <input type="checkbox"/> |

2023 National Survey of College Graduates

# Conclusions

---

- The abstract sections of congressional mandates are opportunities for collaboration and research
- A mandate to assess the feasibility of providing nationally representative estimates should focus on
  - How can the data be relevant?
  - How can the data be of high quality?
